

At **Delorbis Pharmaceuticals Ltd**, we recognize the critical importance of energy management in achieving sustainable operations and minimizing our environmental impact. Our commitment to energy efficiency and conservation is integral to our business ethos and operational excellence. In alignment with the ISO 50001 standard for energy management systems, we are dedicated to continuous improvement in our energy performance.

Core Commitments:

- **Energy Efficiency:** We commit to continuously improving energy efficiency across all aspects of our operations. This includes optimizing manufacturing processes, facility management, and the use of energy-efficient technologies.
- **Sustainable Energy Use:** Delorbis Pharmaceuticals prioritizes the use of renewable over non-renewable energy sources where feasible. We aim to increase our reliance on renewable energy sources steadily, contributing to climate change mitigation and energy sustainability.
- **Energy Consumption Reduction:** We set specific, measurable targets for reducing energy consumption within our operations. By monitoring our energy use and implementing best practices, we strive to achieve these targets, thereby reducing our environmental footprint.
- **Employee Engagement and Training:** Recognizing that our employees play a crucial role in achieving our energy management goals, we engage them in our energy management initiatives and provide regular training on energy efficiency and conservation practices.
- **Procurement Practices:** When procuring equipment, materials, and services, we consider energy performance as a key factor. We aim to select suppliers and products that align with our energy efficiency and sustainability standards.
- **Compliance and Legal Requirements:** We comply with all applicable legal and other requirements related to energy use, efficiency, and consumption. We also commit to staying informed about and adhering to relevant energy regulations and standards.
- **Continuous Improvement:** Our energy management system is subject to continuous evaluation and improvement. We regularly review our energy performance, objectives, and targets to identify opportunities for further enhancements.

We are dedicated to implementing this Energy Management Policy and integrating energy management into our business processes to achieve our energy-related goals effectively. Our Energy Management Policy, documented, maintained, and regularly reviewed, is communicated to all employees and stakeholders. Committed to the implementation of this policy, we ensure its understanding and application within our organization, prioritizing energy efficiency and conservation.
